

Creating Electronically Signed Documents

Below is a list of shortcodes most commonly used in electronic documents:

Patient First Name: \${PatientFirst}

Patient Last Name: \${PatientLast}

Patient Signature: {SignatureImage}

Witness Signature: {WitnessSignatureImage}

Signature Date: {SignatureDate}

Place these shortcodes within your word document consent forms..etc in the place where you are wanting their signature or date to appear after they sign at the bottom of the page.

Access this list at the bottom of the Help Center or download and save this list for future use.
